## Launch Tech USA 8 Aligner

### Alignment with 8 Sensor 20 Degree CCD Technology

- Wireless communication with increased range, less interference and proven reliability
- Alignment Sensors are designed for total on-vehicle operation with on-sensor function control with liquid crystal, multi-function display features front toe, rear toe and camber LED indicators
- Spoiler Program allow the technician to obtain accurate readings with most ground effects without use of drop down adapters
- 20-Degree CCD cameras allow a 20-Degree caster sweep without the use of expensive turn plates.
- Program selection allows technician to choose between 10 or 20 degree Caster Sweep depending on vehicle requirement
- Two Wheel or Four Wheel Alignment capabilities, saves time when only front wheel correction are required.
- Optional 90 Degree Run-out Compensation allows use of the aligner with two post Lifts.
- 6 Meter range for up to 234" wheelbases
- Rugged locking cabinet contains PC with Windows™ XP, printer, monitor, keyboard, mouse and sensor docking stations for storing and recharging sensors
- Latest U.S. vehicle specifications
