## **DON'T PURCHASE PIRATED LAUNCH EQUIPMENT**

Recently, many companies in China are selling copies of equipment originally made by Launch Tech Ltd. in Shenzhen, CN. These pirated products include the X-431 Master and X-431 Diagun, as well as the X-631 Wheel Aligner.

Please be very cautious of these copies and convince your customers not to buy them. There are issues with quality, ability to update software and no warranty or support after the sale.

The diagnostic scan tools from LAUNCH must be upgraded with country-specific software, in order for them to work in the countries they were intended for. In short, if you are in the USA and you buy one of these pirated products, you will not be able to load US vehicle software into it—rendering the tool useless. Similarly, the X-631 Aligner from Launch also comes with a special US database and is upgradeable to earlier versions of the aligner. The unauthorized copies of the LAUNCH products are not updateable or compatible with our software.

An overseas version of the X-431, X-431 Diagun and X-631 is only for sale abroad. LAUNCH does not have in China, any authorized distributors for overseas export, and this includes exports into the US. All agents in China exporting pirated product for overseas sales are illegal.

LAUNCH is engaged with the Ministry of Public Security to combat this piracy and make it illegal to either sell or purchase copies of these LAUNCH products.

Do not be fooled by these copies. Please make sure that you are purchasing LAUNCH products from our authorized US branch and its authorized distributors.
